**RE: Application for a General Quarry Permit for a Rock Collecting Site in Wheatland and Golden Valley County**

Dear Editor:

Please place the following notice in the legal publication section of your newspaper once each week for three consecutive weeks:

#### Legal Notice

Notice of Application for Operating Permit (pursuant to the Metal Mine Reclamation Act, Section 82-4-353 (1), MCA).

Northfork Stoneworks located at 8064 Churchill Road, Manhattan, MT. 59741 filed an application on July 13, 2006 for an Operating Permit from the Montana Department of Environmental Quality (DEQ), Environmental Management Bureau in Helena. Northfork Stoneworks will use an excavator and skidders to expose and remove sandstone rock down to a depth of 20 feet for landscaping and masonry purposes. The operation would be on private land in portions of Section 10, Township 6 North, Range 14 East, Wheatland County, about 15 miles southwest of Harlowton and in portions of Sections 2 and 11, Township 5 North, Range 18 East in Golden Valley County, about 17 miles southwest of Ryegate.

Northfork Stoneworks must obtain an operating permit because the sites cannot stay under the five acre disturbed and unreclaimed limit required under the Small Miner's Exclusion Statement.

The proposed operation has been reviewed for compliance under a Supplemental Programmatic Environmental Assessment (SPEA) for a General Quarry Operating Permit published by the DEQ in February 2004. DEQ has determined that this operation doesn't meet the requirements listed in the SPEA since there would be more than five acres unreclaimed at any one time. An operating permit may be issued once the application is complete, an environmental analysis is performed, and the reclamation bond has been posted to ensure reclamation after completion of the rock

collecting activities. If Northfork Stoneworks develop additional lease agreements on other sites in the future, they would have to apply for an amendment or revision to the operating permit.

The applicant seeks approval for an operating permit that contains two sites. The operating plan calls for reclamation of all surface disturbances.

Copies of the application can be reviewed by the public at DEQ offices at 1520 E. 6<sup>th</sup> Ave., in Helena, MT. Please submit comments or questions on the proposal by September 1, 2006. For information on the project and to submit comments on the proposal, contact:

Herb Rolfes  
Operating Permit Section Supervisor  
Environmental Management Bureau
