The bid amount of \$	per banked cubic yard – for 1 to 500 yards.
The bid amount of \$	per banked cubic yard – for 501 to 1000 yards.
The bid amount of \$	per banked cubic yard – for 1001 to 2000 yards.
The bid amount of \$	per banked cubic yard – for 2001 to 3000 yards.
The bid amount of \$	per banked cubic yard – for 3001 to 4000 yards.
The bid amount of \$	per banked cubic yard – for 4001 to 5000 yards.
The bid amount of \$	per banked cubic yard – for over 5000 yards.

- ❖ A banked cubic yard is one cubic yard of in place soil. This is best determined by measuring the dimensions of the excavation prior to backfilling.

The contractor is requested to submit bid amounts for multiple banked cubic yard categories in anticipation of removing contaminated soil beyond the original estimate. This preparation will reduce delays of renegotiating bid prices when the quantities increase.

Administration

Projected banked yardage:

Only contaminated soil is billed.

Contaminated soil and clean overburden are both billed.

Overburden is billed at a separate rate than contaminated soil.

Yardage verified by whom?

Additional yardage will be authorized by whom?

Landfarm Information

Commercial, Location:

One-time (one-time landfarm application must be pre-approved by DEQ-PTS before soil is transported to site)

Expected life of contamination

Tilling interval

Tilling will be done by whom?

Sampling interval

Number of samples per event

Sampling will be done by whom?

Soil Excavation Unit Cost Worksheet

Item	Included	Not Included	Additional Cost Per Unit (or N/A)
Supervisor Oversight			
Consultant Oversight			
Mobilization/Demobilization			
Fencing and Traffic Control			
Concrete Removal			
Concrete Disposal			
Concrete Replacement			
Asphalt Removal			
Asphalt Disposal			
Asphalt Replacement			
Separation of Clean Overburden			
Removal & Replacement of Overburden			
Excavation of Contaminated Soil			
Laboratory Analysis			
Screening and Removal of Oversize Material			
Loading and Hauling of Contaminated Soil, a distance of _____ miles			
Hauling in Backfill Material. Material is _____ (material type)			
Replace Backfill			
Compaction			
Disposal of Contaminated water; _____ gallons anticipated. Disposed where?			
Commercial landfarm fee per yard			
Commercial landfarm fee per ton			
One-time non-commercial landfarm fee per yard			
One-time non-commercial landfarm fee per ton			
a. Spreading soil at landfarm site			
b. Landfarm sampling			
c. Landfarm tilling			
d. Landfarm reclamation			
Other (please itemize)
