

Department of Environmental Quality – Water Protection Bureau
Construction Dewatering General Permit
Daily Monitoring Log
Revised July 2010

Construction dewatering activities that are authorized under the Construction Dewatering General Permit (“General Permit,” MTG070000) must be monitored in accordance with Part II.B. of the General Permit. The permittee is responsible for recording the required data on a form, as required by the Department.

The permittee is required to fill out the daily discharge information on the attached form, the “Daily Monitoring Log.” If no discharge occurred during the month, write “no discharge” on the form. The form must be maintained for at least three (3) years.

In addition to this daily monitoring log, the Department mails blank monthly Discharge Monitoring Reports (DMRs) under separate cover. The permittee must send a completed DMR to the Department by the 28th of the month following the reported month, as stated in Part III.A. of the General Permit. DMRs must be submitted until the Construction Dewatering authorization is terminated.
